SUMMARY

Senior Software Engineer with 20 years of experience building production systems at scale. Author of 40+ published tutorials on AI, ML, and automation, distilling frontier techniques into practitioner-ready guides. Track record of turning ambiguous requirements into shipped products, designing abstractions that outlast their original context, and building the observability and testing infrastructure that lets teams deploy with confidence. Currently building AI-integrated applications at Algo Dojo, designing agentic workflows that orchestrate LLM calls, internal APIs, and knowledge base retrieval to automate complex user journeys.

TECHNICAL SKILLS

Languages: TypeScript, Python, JavaScript, Ruby, SQL, Dart

Frameworks: ReactJS, NextJS, NestJS, FastAPI, Ruby on Rails, Express, Flutter, Supabase

Infrastructure: AWS, Docker, Temporal, Kafka, Terraform, Vercel, Prisma, PostgresDB, Redis, MongoDB

Tools: Claude Code, Letta, Playwright, Jest, Datadog, LoRA, CrewAI, Ollama, GitHub Actions

EXPERIENCE

Algo Dojo — Atlanta, GA

AI Solutions Consultant | August 2025 – Present

- Designing and deploying agentic workflows that automate complex user journeys saving an average of 2-3 hours of manual data processing per week. Used CrewAI, Letta and Temporal
- Built *the* Medusa plugin that integrates Printify print-on-demand fulfillment. Published to NPM and Yarn with CI-driven conventional-commit releases via Github Actions. Used TypeScript and NextJS
- Open-sourced an agent skills repository on Github for Claude Code, GitHub Copilot, Antigravity, and ChatGPT Codex covering NextJS, Supabase, Datadog, Terraform, Kubernetes, and many more

Vouch Inc — San Francisco, CA

Senior Software Engineer 2 | September 2021 – August 2025

- Accelerated large-scale migration from Ruby on Rails to NestJS micro-services by owning platform-wide authorization integration. Used Ruby on Rails, NodeJS, NestJS, AWS, Prisma ORM, PostgresDB
- Championed Playwright adoption across three teams with a proof-of-concept test suite, reducing deployment-related incidents by 60%; frontend E2E coverage grew from 0% to 78% over 18 months
- Took ownership of automated client renewal email functionality, keeping the company compliant with state regulations. Used Sendgrid, Ruby on Rails, and Mode

Climb Credit — New York, NY

Senior Software Engineer | April 2019 – September 2021

- Built integration infrastructure for third-party services (Iterable, SendGrid, Slack) and custom B2B partners, establishing patterns that became the standard for all new integrations.

- Mentored junior developers through structured onboarding and code review sessions; established a knowledge-sharing practice that persisted after departure
- Implemented automated E2E testing with Cypress, improving deployment confidence for the student loan origination platform
- Used ReactJS, AngularJS, NodeJS, SASS, ExpressJS, Webpack, Docker, Kubernetes, and MongoDB

American Express — New York, NY

Architect 3 | June 2018 – March 2019

- Generated A/B tests resulting in \$23MM in added revenue for the Global Card Shop Consumer Experience Organization using ReactJS, React Router, Redux, GraphQL, NodeJS, SASS, ExpressJS, and Webpack.
- Developed reusable ReactJS components with 100% test coverage.

dv01 — New York, NY

Software Engineer | June 2017 – April 2018

- Used ReactJS, Redux, D3, and Scala to bring transparency to \$13T of consumer lending by enabling customers at banks, hedge funds, and credit originators to quickly extract insights from large private and public datasets

Earlier Experience

- **360i** — React Developer, contract (March 2017 – April 2017) ReactJS
- **Sparks Grove** — React Developer (July 2016 – February 2017) ReactJS, Redux, and D3
- **Autotrader** — UI Engineer (February 2015 – May 2016) ReactJS and Flux
- **Razorfish** — Presentation Layer Engineer (October 2014 – February 2015) ReactJS
- **AT&T** — Senior HTML5 UI Engineer (February 2012 – October 2014) Angular
- **WebMD** — Web Developer IV (February 2010 – February 2012) Actionscript3, JS/HTML/CSS
- **Autotrader** — UI Engineer (January 2008 – February 2010) PrototypeJS and JSONP

EDUCATION

Morehouse College — B.S., Computer Science, 2006

Atlanta's John Marshall Law School — J.D., Patent and Taxation Law, 2015

COMMUNITY

Code Nation — Volunteer Teacher, 2018–2021. Taught HTML, CSS, and JavaScript (jQuery) to students of under-resourced schools in New York City. Placed high school students into internships at Google, SeatGeek, and Salesforce — opportunities typically reserved for college candidates.
